

Venomous Snakes of Florida

Eastern Coral Snake (same family as the cobra: neurotoxin venom)

**Canebrake Rattler

**Canebrake Rattler (stripe on back)

Dusky Pigmy Rattle Snake (babies are the size of a quarter)

Eastern Diamondback Rattle Snake (**Largest venomous snake in USA**)

**Southern Copperhead

**Southern Copperhead

Water Moccasin/Cotton Mouth (Babies look very similar to copperheads).

**Southern Copperheads found only in Northwest Florida (Eastern most part of the Panhandle). **Canebrakes found in N. Florida near GA border

Snakes are Venomous, not Poisonous.

Poisonous – only requires direct contact with the substance (reptile) for it to be absorbed into the body.

Venomous – requires injection of the venom to harm the body
